

SCHEDULE E: SERVICE DEFINITION: AUDIO CONFERENCING SERVICE

1. Audio Conferencing Service Description

The Audio Conferencing Service enables users to create an audio conference that can be accessed by any telephone using a conference access number and user specific Moderator and Participant conference access codes. One DDI number is allocated as the conference access number. Each instance of an audio conference will have a unique Moderator conference access code and Participant conference access code.

Audio Conferencing Service Variants

The Audio Conferencing Service is available in a number of variants as follows:

| Customers who have purchased Hosted PBX Service or the SIP Trunking Service | |
|--|--------------------------------|
| Variant Name | Maximum number of Participants |
| Small | 10 |
| Medium | 25 |
| Large | 50 |
| Extra Large | 250 |

| Customers who have not purchased Hosted PBX Service or the SIP Trunking Service | |
|--|--------------------------------|
| Variant Name | Maximum number of Participants |
| Large | 50 |
| Extra Large | 250 |

2. Target Service Commencement Date

Audio Conferencing Service 30 Working Days*

** From order acceptance if provisioned over an existing Exponential-e Ethernet access circuit / from date of provision of any new Smart Wires Service required.*

3. Audio Conferencing Service Level Agreement

Audio Conferencing Availability

The Audio Conferencing Service availability is defined, for each particular Customer Site, as the ability to connect to the Audio Conferencing Service from a phone.

| | Target Availability |
|----------------------------|---------------------|
| Audio Conferencing Service | 99.99% |

Service Credits

| | Measure | Service Credit* |
|--------------|-------------------|-----------------|
| Availability | >0.1 Below Target | 5% |
| | >0.5 Below Target | 10% |

** The service credit is applied as a percentage of the fixed Monthly Charge for the Audio Conferencing Service for the affected Customer Site only*
