

# Cyber Security Testing & Compliance Services

PEN Testing, Governance, Risk and Compliance Audit, Cyber Security Consultancy

Cyber Security compliance is not only a legal requirement, but also means that your business is prepared and protected from the dangers of the digital world.

Exponential-e, together with a trusted and independent partner, provide PEN testing, compliance auditing, Cyber Essentials standards and much more. Enable your business and IT team to focus on core business requirements whilst leaving your Cyber Security in safe, reliable hands.

What's more, all test personnel are security cleared and CHECK, CREST and TIGER accredited.

From a legal and industry standpoint businesses need to meet Cyber Security compliance standards, which demonstrates they know how to react to Cyber Security issues in order to keep and maintain financial information on behalf of customers. Commonly compliance standards are also used as a due diligence tool before companies engage in business, as part of their evaluation requirements.

### A Trusted Testing and Audit Supplier

Ensuring a suitable provider is selected can be time-consuming, so instead remove the stress from your IT team and allow Exponential-e to handle the process for you. We have access to an independent partner who can provide all requirements for Penetration (PEN) Testing, auditing against compliance standards, Cyber Essentials Plus (CES+) and IT health checks (CESG standard). This service has highly skilled and accredited audit experts, selected for their wealth of knowledge in the industry.

In order to further offer convenience to our customers, we are able to provide this independent capability within a service, cost and billing model provided directly from Exponential-e.

### Objective Advice and Project Reports

Through using an established testing and audit company, well known to the industry, we are able to provide you with entirely impartial service and advice. Any environment serviced or housed by Exponential-e can be independently and objectively assessed to the compliance standard that our customers expect. This ensures that we meet your business requirements and specific industry standards.

### Convenient and Actionable Insight

By choosing Exponential-e to provide your Cyber Security testing, via our trusted partner, your business can avoid the process of on-boarding an additional supplier and service provider, whilst consolidating your costs in to your standard invoice from Exponential-e. We can also work to maintain an ongoing annual history of your security estate if required, which will provide your business with the information it needs to make informed IT business decisions.
