# Identity as a Service Premium

Delivering Cloud-based Identity Lifecycle Management

IT teams need to dynamically adapt to meet the increasing demands of an ever-evolving remote workforce. Whether this is to efficiently manage the onboarding or offboarding of employees, or granting access to business-critical applications, Identity as a Service (IDaaS) Premium from Exponential-e enables secure connections between people and technology through a combination of solutions such as **Multi-Factor Authentication**, **Single Sign-On** and enhanced IT provisioning, with **Lifecycle Management and Universal Directory** for Cloud-based identity lifecycle automation.

## Automate the process of onboarding and offboarding users

Both new and existing employees expect instant access to the technology and tools they need to deliver their best, with all the necessary permissions for tools and applications already in place. IT teams must therefore deliver environments where the onboarding and offboarding processes can be intelligently automated, with the freedom to deliver services remotely. Reduce complexity and gain visibility into who has access to what with a single source of truth across your entire organisation, taking all the stress out of providing user groups with the appropriate permissions.

## Reduce IT friction

With businesses becoming more application-centric, remote access to key applications from multiple devices is a priority. With an increasing number of password-protected devices to managed, employees may be tempted to use simple or duplicate passwords that can easily be hacked. However, if secure, complicated passwords are used, they are often quickly forgotten, resulting in **40% of helpdesk calls** being

for password reset. However, automating time-consuming tasks like provisioning, deprovisioning and password resets frees IT teams to focus on business transformation.

## How IDaaS Premium can help:

**Remote Lifecycle Management.**
Automatically onboard and offboard users.

**Secure Offboarding.**
When an employee leaves the company, ensure that 100% of their access is revoked at precisely the right moment.

**Automate IT.**
Provide automated app creation and changes.

**Simple Processing.**
Manage the joiner, mover and leaver process simply and effectively.
**Automate Access Decisions and Prevent Errors.**
Give new employees secure access from day one.

## Lifecycle Management

Our Lifecycle Management solutions offers Cloud-based identity lifecycle automation, increasing IT process efficiency and streamlining access decisions.
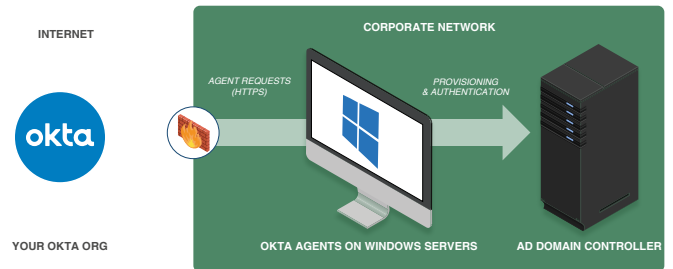

- Automatically provide immediate, secure access to new employees and immediately revoke leavers' access.

- Save an average of 30 minutes per provisioning of IT admin time.

- Assign attribute-based rules (position, department, geography) to grant users access to certain applications.

- Sophisticated control of identities across lifecycle states, with automation through rules, policies, workflows and APIs.

- Easily generate reports around application assignment, application access, and deprovisioning of users.

## Universal Directory

Our Universal Directory solution provides you with one place to manage all your users, groups and devices, allowing you to store an unlimited number of users and attributes from applications and sources like HR systems.Risk-based authentication to identify abnormal login patterns.

- A single pane of glass management solution.

- Password management, allowing for group policies and complexity options.

- Eliminate helpdesk calls for AD  password resets.

- Integrate with internal systems to retrieve dynamic data or additional entitlements for downstream applications.

## Trust in Exponential-e's security ecosystem to support you

Exponential-e helps organisations identify and enhance their Cyber Security controls. We help all our customers to successfully remediate vulnerabilities, threats, and breaches. With experienced consultants, best-of-breed technologies and impeccable customer service, we can offer Cyber Security solutions for any organisation – no matter the size or sector.

Exponential-e's Cyber Security product portfolio demonstrates our ability to provide expertly managed security solutions for our customers, including:

- 24/7 UK-based Security Operations Centre.

- CSOC Managed Service, for real-time monitoring and alerting.

- 8xISO accredited organisation. Exponential-e are committed to compliance, excellence and GDPR requirements.

- Platinum partnerships with numerous industry-leading Cyber Security vendors.

- Expertise and initiative from our experienced and certified consultants (CISSP, CISM, PCIP, ISO27001 and PCIP).

- Custom-built, cutting-edge Cyber Security solutions designed by our qualified Security Pre-sales team.

- Consistently high quality delivered on time and to budget.

- Experience across a wide range of sectors and industries. We can provide a strong set of testimonials to demonstrate our Cyber Security capabilities.

## About Exponential-e

Innovation is at the core of Exponential-e, and has been since our inception in 2002. We wholly own our super-fastNetwork, and our fusion of complementary technologies - a carrier-class Network and Cloud infrastructure - means we can deliver enterprise applications at wire speed for a superior end-user experience. We deliver scalable, dynamic and bespoke solutions. Renowned for our responsiveness, coupled with our customer centric approach, and a UK based 24 / 7 x 365 service desk, means we offer unrivalled expertise.
