Vulnerability Scanning Service
IT Security and Vulnerability Management made simple

Everywhere we look, organisations are being hacked when they least expect it. IT security teams used to rely on simple anti-virus solutions and basic firewalls to keep networks, applications and hardware safe from potential threats, but in today's fast-moving, Cloud-driven environment, this level of security is no longer fit for purpose.

Vulnerability Scanning Service

Cybercriminals actively seek out exploitable gaps within your security to cause substantial damage to your brand reputation, finances and data. It is therefore imperative to conduct regular vulnerability assessments to proactively identify and resolve weaknesses within your corporate infrastructure, before they can be exploited.

Our Vulnerability Scanning service, delivered in partnership with Outpost24 (Vulnerability Risk Management challenger - Forrester's 2019 Report), identifies and remediates vulnerabilities by delving into your security infrastructure to proactively hunt out threats and patch risks. Our scalable solution provides tailored vulnerability reports for both management and technical staff, along with action plans to mitigate any threats to your business.

The expanding threat landscape

The distributed workforce has resulted in new challenges when it comes to the visibility, control and security of endpoint devices. Instead of your teams working from a secure location at your head office, the rapid rise of home working has exposed new security vulnerabilities, such as concerns over shadow IT. Even with best efforts, simply initiating another series of security patches and firewalls to keep your infrastructure protected has become insufficient, as hackers will spend (on average) one fifth of the time infiltrating your network, application or hardware than it would take to successfully implement an appropriate security patch.

Take systematic, preventative measures

Exponential-e offer a Vulnerability Scanning service that examines network perimeters, identifies vulnerabilities and provides actionable remediation with risk-based insights. Mimicking the actions of the most effective cybercriminals, we add an extra layer of value by analysing and advising where you should implement extra precautions.

Features and Benefits

Automated Scan Schedule

Finds new assets and adds them to your regular vulnerability scans automatically with smart scan scheduling, helping you achieve greater efficiency in your effort to reduce vulnerabilities.

Agent-based Scanning

Agent-based scanning enables organisations to extend security controls to remote workforces and achieve greater efficiency by assessing remote assets for vulnerabilities.

Scanning-less Scanning (SLS)

Unique SLS technology takes a fingerprint of your network and alerts you of potential new risks as they appear in between scans to keep you up to date.

Dynamic Target Management

Effectively manage your assets by using dynamic groups to segment and map your targets, for example, by location, business unit or asset owner. Using meaningful categorisations, you improve efficiency.

Solution-based Reporting

Our detailed reports help identify and filter your security priorities, as well as providing actionable insights o how to resolve vulnerability issues. With different levels of detail, you can share the information with other stakeholders across the business.

Risk based Vulnerability Prioritisation

Using industry standards CVSS rating and real time risk based scoring, our tool enables smarter and predictive vulnerability prioritisation for fast remediation.

Exponential-e. not just another MSSP

Exponential-e helps all organisation identify and enhance their Cyber Security controls. We help all our customers remediate vulnerabilities, threats, and breaches extremely seriously. With experienced consultants, best-of-breed technologies and impeccable service quality, we can offer Cyber Security solutions for any organisation - no matter the size or sector. Exponential-e's Cyber Security product portfolio demonstrates our ability in providing expertly managed security solutions to our customers, encapsulating:

- Nearly 20 years' experience as a provider of Managed Security services.

- 24 / 7 UK-based Security Operations Centre.

- CSOC Managed Service, for real-time monitoring and alerting.

- 8x ISO accredited organisation. Exponential-e are committed to compliance, excellence and GDPR requirements.

- Platinum partnerships with numerous industry-leading Cyber Security vendors.

- Expertise and initiative from our experienced and certified consultants (CISSP, CISM, PCIP, ISO27001 and PCIP).

- Custom-built, cutting-edge Cyber Security solutions designed by our qualified security pre-sales team.

- Consistently high quality delivered on time and in budget.

- Experience across a wide range of sectors and industries. We can provide a strong set of testimonials to demonstrate our Cyber Security capabilities.

Exponential-e is a Cloud, Connectivity and Communications pioneer with a difference. From launching the world's first Virtual private LAN in 2006 on our privately-owned 100GigE secure and super-fast Network to our recent launch of the world's first Software Defined Digital Platform (SD-DP), our commitment to innovation has resulted in us being recognised as one of the fastest-growing private companies in the UK, with 8 ISO accreditations to our name.

We have an extensive solutions portfolio that enables us to create services tailored specifically to our customers' operational needs - whether that be for Private, Public or Hybrid Cloud, Data Centre,

Unified Communications, Cyber Security or Managed IT Services.

Exponential-e has carried out over 60 Digital Transformation (DX) projects for major clients in the last three years alone. Drawing on our DX Toolbox and supported by our SD-DP, our flexible DX Blueprint can be applied to execute your DX strategy - whatever your size or sector.

Whether it's for a single service or transformative solution, we deliver Peace of Mind-as-a-Service to our customers: that's why we are trusted by over 3,000 customers, with 96% reference-ability and an industry-leading Net Promoter Score.
