

SCHEDULE B: SERVICE DEFINITION FOR ENHANCED OPERATIONAL MANAGEMENT LEVEL – OS & APPLICATION MANAGED

The Enhanced Operational Management Level – OS and Application Managed provides operational management of the Supported Items within virtual server environments on Hyper-V and VMWare hypervisors, as well as physical environments, up to the Operating System (OS) and application level. This Enhanced Operational Management Level provides a fully-maintained Operating System and application environment, based on systems listed in the Functional Capability section below, and configured by the Service Desk to the Customer's requirements.

The OS & Application Managed service provides the following components:

- Installation of the OS and application managed environment based on Exponential-e's standard OS build specification, for the OS and application configurations listed in the Functional Capability section of this Schedule B.
- Decommissioning of the OS managed environment based on Exponential-e's standard ITIL compliant OS and application decommissioning process.
- Installation and configuration of the required software needed to support Exponential-e's service delivery of the OS and applications (including AV, backup, monitoring software, and the setup of VM tools where applicable).
- Configuration and management of the OS and application environment, including any OS and application options, features, or supported applications installed onto the OS.
- Provisioning of the OS and applications licenses, where purchased by the Customer through Exponential-e.
- Exponential-e's standard AV solution installed and configured for the OS and application workloads, and managed as set out in this Schedule B.
- Continuous (24x7x365) OS and application monitoring and alerting.
- Backup management of the OS and application environment, including configuring daily backups, monitoring the backups daily, picking up backup faults, and remediating them for OS and application issues to Exponential-e's standards detailed in this Schedule B.
- Carry out full system and file level restores from backup for the OS and application environment as requested by the Customer.
- Automated analysis and resolution of incidents raised for configured OS and application alarms and warnings.
- Manual analysis and resolution of incidents raised for OS and application alarms and warnings that cannot be automatically resolved.
- Manual changes raised for OS and application changes recommended by Exponential-e.
- Delivery of approved changes raised by Exponential-e and the Customer.
- Patch Management of OS and application patches in line with Exponential-e's standard, ITIL compliant patching process as detailed in this Service Document.
- Exponential-e administration and user account management.

Functional Capability

Exponential-e manages and supports the Supported Item OS to Exponential-e's standard build specification for the vendor's products under Mainstream Support, as detailed in the following location and amended from time to time: <https://www.exponential-e.com/operating-systems-support>.

Operation

The OS & Application Managed Enhanced Operational Management Level components are as follows.

Exponential-e's responsibilities with respect to the OS & Application Managed Enhanced Operational Management Level are described within the following table. The Customer is responsible for all management activities not included within Exponential-e's responsibilities below.

| Aspect | Exponential-e's Responsibilities |
|---|---|
| Active Directory | <ul style="list-style-type: none"> • Infrastructure management such as the creation, modification, or deletion of AD sites, site links, subnets, and trusts. • Carry out monthly automated health checks. • Monitor and manage AD replication. • Creation and management of Group Policy Objects for all Supported Items. • Notify the Customer of any Group Policy changes that may affect Supported Items. • Backup of Active Directory database. • Restore deleted Active Directory objects using AD Recycle Bin functionality (when implemented). • Restore the Active Directory database (as required and upon approval from the Customer). • Creation and management of service accounts for Supported Items and Managed Services. • Reporting of Active Directory failed access attempts will be provided as part of security exception reporting events. |
| Active Directory Federated Services ("ADFS") | <ul style="list-style-type: none"> • Managing the ADFS Farm topology. • Managing the Trust Policy on Federation Servers. • Managing Certificates used by Federation Servers. • Create claims provider trusts. • Provide ADFS SSO support for 3rd party applications. |
| Anti-virus ("AV") Agent | <ul style="list-style-type: none"> • Set up and manage AV configuration settings including recommended vendor exclusions for the OS and applications. • Identify new AV signature updates and approve these updates to be made to agents automatically on an hourly schedule. • Monitor and manage AV signature downloads and AV application. • Identify eligible AV product and agent software (including upgrades) that apply to all Supported Items. • Notify the Customer of eligible AV product and agent upgrades via new change ticket, and the time when these upgrades will be carried out. • Carry out product and agent upgrades at the time agreed by the Customer. • Install and configure agent software on new Supported Items. • Monitor and notify the Customer of any detected virus infections. • Remove virus infections from Supported Items once detected and where possible. • Produce and maintain a document in the CMDB detailing the Exponential-e AV process and the processes the Customer must follow to report new virus infections, request AV version updates, request AV product changes etc. |

| Aspect | Exponential-e's Responsibilities |
|-------------------------------|---|
| Application Management | <ul style="list-style-type: none"> • Conduct routine maintenance and management of application environments. • Implement maintenance procedures. • Investigate application outages. • Investigate application performance issues. • Work with the Customer or 3rd parties to resolve application problems or outages. • Investigate and address root causes for outages and application performance issues. • Provide the Customer with regular updates on resolution efforts. • Ensure that proper systems or management changes are put into place based on recommendations from application vendors. |
| Asset Management | <ul style="list-style-type: none"> • Management of OS and application licenses, including arranging Customer renewals and keeping up to date OS and application license records. • Maintain a valid software library for OS and application software owned or leased by the Customer as provided by the Customer. • Maintain a valid software library for OS and application software provided by Exponential-e to the Customer. • Retain hardware information for Supported Items in the CMDB regarding their specification, warranty and configuration. • Maintain a full and up to date asset management register for Supported Items that is available to the Customer in the CMDB. |
| Backup | <ul style="list-style-type: none"> • Configuring daily backups of all Supported Items to include the ability to restore individual files as well as whole Operating System environments and the data it contains. • Monitoring backups daily. • Test application specific backups and restores during the On Boarding activity to prove the recoverability of backed up data. • Use reasonable endeavours to detect backup faults and remediate them for OS and application issues. • Carry out full system restores from backup as requested by the Customer. Each Supported Item includes one full system restore event per annum without additional charge. Additional full system restores can be completed at additional charge. • Carry out OS and application file level restores from backup as requested by the Customer. Each Supported Item includes sixty (60) file system restore events per annum without additional charge. Additional file level restores can be completed at additional charge. • Produce and maintain a document in the CMDB detailing the backup settings used to back up Supported Items, and the processes the Customer must follow to back up and restore Supported Item data. |

| Aspect | Exponential-e's Responsibilities |
|--|--|
| Certificate Management | <ul style="list-style-type: none"> • Manage certificate renewals for OS and application functionality with Customer approved providers for Supported Items on behalf of the Customer. • Keep up to date certificate records available in the CMDB. • Link OS and application level certificates to the OS for Supported Items. • Manage bespoke certificate provider authorisation licenses on Supported Items. |
| Disaster Recovery and Business Continuity | <ul style="list-style-type: none"> • Provide the Customer with a standard format Disaster Recovery and Business Continuity document for the Supported Items. • Request sign off from the Customer stakeholders for the standard format Disaster Recovery and Business Continuity document for the Supported Items. • Participate in isolated DR exercises for the Supported Items once a year (to support DR failover exercises delivered remotely on a sample and isolated environment as detailed in the Disaster Recovery and Business Continuity document, unless agreed otherwise in writing by the Parties). • Participate in chargeable Disaster Recovery simulations with the Customer on Supported Items if requested by the Customer. This is subject to a minimum of five (5) Working Days' notice provided to the Service Desk by the Customer. • Coordinate with the Customer's representatives to execute DR processes in line with the Customer's IT Disaster Recovery and Business Continuity Plan, at the Customer's request. Exponential-e is responsible for carrying out all activities agreed for completion by Exponential-e in the Customer's IT Disaster Recovery and Business Continuity Plan. • Participate with the Customer on an annual basis to review and improve the Disaster Recovery and Business Continuity document. |
| Documentation | <ul style="list-style-type: none"> • Maintain solution design documentation for Supported Items in the CMDB. • Maintain solution configuration documentation for Supported Items in the CMDB. • Maintain solution testing documentation for Supported Items in the CMDB. • Ensure that the CMDB includes the day-to-day operational procedures for the OS and Application Managed Enhanced Operational Management Level. • Produce and maintain a document detailing the configuration of the standard OS images available from Exponential-e's VDC and private cloud environments. • Implement and maintain version control for all above documentation. |
| Domain Management | <ul style="list-style-type: none"> • Manage Customer owned DNS domain names via authorised DNS domain providers. • Document owned DNS domain names in the CMDB. • Advise the Customer at least three (3) months in advance of upcoming end of DNS domain name ownership end dates. |

| Aspect | Exponential-e's Responsibilities |
|-------------------------------|---|
| | <ul style="list-style-type: none"> • Complete DNS domain name renewals on behalf of the Customer when required to do so by the Customer. • Procure new available DNS domains on behalf of the Customer upon request from the Customer. • Maintain accurate and up to date records of owned DNS domain names. |
| End of Life Management | <ul style="list-style-type: none"> • Advise the Customer at least three (3) months in advance of upcoming End of Life dates of any Supported Items. End of Life meaning the relevant vendor no longer supports the applicable item. • If the Customer is not able to upgrade the OS or applications by the End of Life date, Exponential-e will use reasonable endeavours to continue to deliver the OS & Application Managed Enhanced Operational Management Level in accordance with this Schedule B however the Flex Manage service level agreement shall not apply to any Supported Items that have reached their End of Life date. |
| File Server | <ul style="list-style-type: none"> • Produce monthly storage utilisation reports. • Implement and manage disk, folder, and user quotas. • Monitor and check that AV software is up to date and scheduled virus checks is run regularly. • Manage file server configuration settings. • Manage Linux and Windows file server features. • Restoring deleted files or folders on Windows file servers using Shadow Copy where supported. |
| Licensing | <ul style="list-style-type: none"> • Exponential-e is responsible for licensing management under the Contract to cover: <ul style="list-style-type: none"> ○ Application agents for AV as applicable for the Supported Items. ○ Application agents for backup as applicable for the Supported Items. ○ License management to ensure the Supported Items have OS and application licenses and utilisation CALs/SALs. ○ RMM monitoring agents as applicable for the Supported Items. <p>For the avoidance of doubt, this covers management of licences, not the provision of those licences.</p> |
| Monitoring | <ul style="list-style-type: none"> • All Supported Items will be configured with a RMM method that will be used to proactively monitor the health and availability of the Supported Items. • Configuring and maintaining standard, automated OS and application monitors for Supported Items to notify Exponential-e of OS and application issues and outages. • Document all monitoring settings for all Supported Items during the On Boarding activity and make this information visible to the Customer in the CMDB. Update the documentation when monitoring changes are made. |

| Aspect | Exponential-e's Responsibilities |
|--|---|
| | <ul style="list-style-type: none"> • Proactive monitoring of Supported Item CPU, RAM, disk space, and network utilisation if access to this information is provided by the Supported Item, and storing this information for thirty (30) days. • Proactive monitoring of all Supported Items at regular intervals (as agreed during On Boarding) to collect standard OS and application metrics. • Carrying out Exponential-e standard automated health check and performance monitoring for Supported Item Operating Systems and application. • The Customer may choose up to five (5) additional OS monitors from Exponential-e's list of available additional OS and application monitors that Exponential-e will monitor for Supported Items. • Logging issues uncovered by OS and application monitoring within the management platform. • Process issues uncovered by OS and application monitoring to remediation (where possible). • Management and maintenance of the monitoring agent software. |
| Operating System and Application Minor Upgrades | <ul style="list-style-type: none"> • Minor upgrades include all updates to the OS of the Supported Items that can be performed on the existing system. These upgrades do not require the existing supported OS environment or the applications running on it to be rebuilt to perform the upgrades. The following upgrades are included alongside the OS-level minor upgrades: <ul style="list-style-type: none"> ▪ Hardware firmware upgrades ▪ All OS RMM agent upgrades ▪ All backup software agent upgrades ▪ All anti-virus software agent upgrades <p>Major Upgrades (including all updates to the OS or other parts of the Supported Items that require a new physical or virtual OS to be built) are not included with the OS and Application Managed Enhanced Operational Management Level and if required, will be undertaken by Exponential-e subject to additional Charges.</p> <ul style="list-style-type: none"> • All upgrades to Supported Items will be subject to the change management process, and the Customer will be required to approve all upgrade changes before the Service Desk will carry them out. |
| Patch Management | <ul style="list-style-type: none"> • Provide a list of critical, security, and non-critical OS and application updates (as identified by Exponential-e's third party patching solution) to the Customer on a monthly basis, at least five (5) days prior to the scheduled installation date. The Customer must confirm to Exponential-e in writing which of the identified critical and security updates are to be installed during the next patching event onto Supported Items. • Install Customer approved critical and security OS and application updates onto Supported Items on a monthly schedule. • Install Customer approved non-critical OS and application updates onto Supported Items on a monthly schedule, or less frequently (as agreed by the Parties during the Supported Item On Boarding process). |

| Aspect | Exponential-e's Responsibilities |
|----------------------------|--|
| | <ul style="list-style-type: none"> • Provide a list of critical and performance updates for Supported Item hardware to the Customer on a quarterly basis, at least five (5) days prior to the scheduled installation date. The Customer must confirm to Exponential-e in writing which of the identified critical and performance updates are to be installed during the next patching event to Supported Items. • Install Customer approved critical and performance updates onto Supported Item hardware on a quarterly schedule. • Provide a list of non-critical and firmware updates for Supported Item hardware to the Customer on a semi-annual basis, at least five (5) days prior to the scheduled installation date. The Customer must confirm to Exponential-e in writing which of the identified non-critical and firmware updates are to be installed during the next patching event to Supported Items. • Install Customer approved non-critical and firmware updates onto Supported Item hardware on a semi-annual schedule. • Install critical and performance updates onto Supported Item hardware on a quarterly schedule. • Install non-critical and firmware updates onto Supported Item hardware on a semi-annual schedule. • Notify the Customer of proposed OS, application, and hardware updates to the Supported Items at least three (3) Working Days prior to the scheduled update. • Configure all Supported Items for automated update installation by the Service Desk. Supported Items that are not compatible with the Exponential-e automated update process will be updated manually. • Invoke the Emergency Patch Procedure when updates are identified by the vendor, the Customer or Exponential-e as urgent. This procedure is a variation of the Standard Patch Procedure and aims to expedite the installation of the OS and application update for the Supported Items. This procedure is documented in the CMDB. • Create the Standard Patch Procedure and the Emergency Patch Procedure jointly with the Customer and document these procedures in the CMDB and schedule Patching in line with the Procedures. • Patch management excludes any item that would in Exponential-e's reasonable opinion cause significant impact to the existing Supported Item. For example, a patch that may require a full rebuild of the Supported Item. This will be a chargeable Professional Services engagement. • Patch Management excludes security hardening of the Supported Item required by regulatory or compliance purposes. This will be a chargeable Professional Services engagement. |
| Performance Testing | <ul style="list-style-type: none"> • Perform OS, application, and service testing on request from the Customer as required in response to a perceived performance issue. • Confirm OS & application testing prior to entry into Early Life Support. |

| Aspect | Exponential-e's Responsibilities |
|---|--|
| | <ul style="list-style-type: none"> • Prepare and execute load simulations against managed application environments in response to a perceived performance issue. • Provide the Customer with reports from these load simulations. • Analyse application behaviour during load simulations to help isolate performance bottlenecks. • Recommend configuration changes to reduce bottlenecks as required in response to a perceived performance issue against the OS or applications. |
| Print Server | <ul style="list-style-type: none"> • Updating printer drivers as requested by the Customer, or once a year if required. • Install new printer drivers on request of the Customer on the Print Server. • Create printer objects and publish these to Active Directory. • Manage printer permissions as instructed by the Customer. |
| RADIUS & Two-Factor Authentication | <ul style="list-style-type: none"> • Monitor and manage the general health of the managed RADIUS service. |
| Remote Desktop Services | <ul style="list-style-type: none"> • Monitor and manage the general health of the Remote Desktop Services and configuration to Microsoft best practices. • Monitor the performance of the Remote Desktop Services. • Highlight performance exceptions to the Customer and recommend remediation actions. • Manage user access to Remote Desktop Services. |
| Reporting | <ul style="list-style-type: none"> • Delivering the following performance and management reports for Supported Items covering a thirty (30) day period: <ul style="list-style-type: none"> ○ Performance Review ○ Computer Audit ○ Patch Compliance ○ Anti-virus Health ○ Software List |
| SCCM | <ul style="list-style-type: none"> • Monitor and manage the general health of the SCCM environment and configuration to Microsoft best practices. • Assist the Customer in eliminating the SCCM infrastructure as a possible cause of user issues. • Ensure all scheduled maintenance tasks run as necessary. • Provide automated audit records of software usage for systems with the SCCM agent installed. • Planning and configuration of compliance enforcement across SCCM agents. |
| Server Replication | <ul style="list-style-type: none"> • Installation and configuration of Server Replication software agent on Exponential-e provided virtual servers that are Supported Items. • Installation and configuration of Server Replication software agent on public cloud provided servers that are Supported Items. |

| Aspect | Exponential-e's Responsibilities |
|---|---|
| | <ul style="list-style-type: none"> • Monitor and alert on the availability and performance of the Server Replication software applied to Supported Items. • Provide proactive remediation of Server Replication issues generated through the monitoring and alerting toolsets for Supported Items. • Identify new Server Replication software updates via a new change ticket for the software updates, and the time when these updates will be carried out. • Carry out product and agent updates at the time agreed by the Customer. |
| SQL Server | <ul style="list-style-type: none"> • Monitor and manage the general health of the SQL database system and configuration to Microsoft best practices. • Monitor the performance of the SQL server and highlight performance exceptions and recommend remediation actions. • Manage standard SQL Server Service maintenance tasks. • Monitor SQL Server transaction logs. • Conduct standard SQL Server Database maintenance operations. • Manage SQL Server permissions. • Monitor and manage the health of SQL high availability features such as failover clustering, replication, log shipping, mirroring, and AlwaysOn Availability Groups. |
| Standard Installation Activities | <ul style="list-style-type: none"> • Installation of Exponential-e RMM agents on Supported Items. • Configuration of Exponential-e standard monitoring on Supported Items. |
| Standard Operational Activities | <ul style="list-style-type: none"> • Configuration of remote access to the OS and applications. SSH is configured for Linux, and ScreenConnect is configured for Windows systems. • Configuration of management accounts for Exponential-e engineering staff. • Server reboots when required to keep OS and application functionality working, and when required by the Customer. • Service restarts for OS and application services. • Clearing temporary files and logs to release available OS and application space. • Identification of high risk OS and application issues. • Monitoring and delivering monthly Customer reports on the Flex Manage service level agreement. |

Customer Pre-requisite Requirements

To start OS & Application management of a Supported Item, Exponential-e requires the following pre-requisites to be fulfilled by the Customer during the On Boarding period.

- Provision of an OS license for the Supported Item if this is not provided by Exponential-e.
- Provision of an Application license for the Supported Item if this is not provided by Exponential-e.
- Provision of an AV license for the Supported Item if this is not provided by Exponential-e.
- Provision of a Backup license for the Supported Item if this is not provided by Exponential-e.

- Conducting the On Boarding activities (as identified by Exponential-e during the On Boarding process) including provision of information needed by Exponential-e to correctly manage and support the Supported Items.
- Provision of design documentation for currently running Supported Items, where this exists.
- Provision of Configuration documents or CMDB information for currently running Supported Items where it exists.

Customer Dependencies

For Exponential-e to deliver the OS & Application Managed Enhanced Operational Management Level, the following Customer dependencies exist. Failure of the Customer to meet these Customer Dependencies may affect the service Exponential-e is able to deliver to the Customer, and Exponential-e's obligations under the Flex Manage service level agreement.

- The Customer shall provide documented naming conventions for all Supported Items.
- The Customer shall provide documented active Customer IT policies for all Supported Items at the time of starting the On Boarding process.
- The Customer shall provide Exponential-e with advice in advance of any peculiar, special, or particular modifications made to the Supported Item. This includes advice on the Exponential-e OS base level configuration as well as Exponential-e's standard OS & Application Managed practices.
- The Customer shall be responsible for documenting and maintaining any differing configuration and build requirements pertaining to the existing OS environment that is peculiar, special, or has had particular modifications applied.
- The Customer shall provide, in accordance with the timelines defined during the On Boarding activity, approval for patching events, the approved list of updates to be installed, and approved list of firmware to be installed on physical Supported Items.
- The Customer shall undertake application and pre-deployment compatibility testing before authorising Exponential-e to deploy recommended patches to Supported Items.
- The Customer shall review the compatibility of all custom and non-standard applications or line of business applications with the OS and service packs to be used.
- The Customer shall ensure that the Customer endpoints and management environments are secured, patched, and maintained in accordance with Good Industry Practice.
- The Customer shall ensure that the Customer applications layered on top of the OS are secured, patched, and maintained in accordance with Good Industry Practice for Supported Items that exists prior to the On Boarding activity.
- The Customer shall assess in advance the application suitability for virtualisation of their applications, and for use with the hypervisor used for VMs.
- The Customer shall work with Exponential-e to replace all End of Life Supported Items before the arrival of the End of Life date.
- The Customer shall review the compatibility and suitability of the selected Supported Item configuration for its intended application usage.
- The Customer shall provide Exponential-e with administrative rights on the Supported Items in order to provide the OS & Application Managed Enhanced Operational Management Level on Supported Items.
- The Customer shall be responsible for all Supported Items being protected by AV software. Supported Items not deployed with AV software are not covered by the OS & Application Managed Enhanced Operational Management Level for virus infections free of charge.
- The Customer shall be responsible for all Supported Items being protected by backup software. Supported Items not deployed with backup software are not covered by the OS & Application

operational support level for rebuild by Exponential-e free of charge.

Service Education

Exponential-e will provide education to Customer staff about the details of the support provided, and how to make use of the provided OS & Application Managed Enhanced Operational Management Level. Exponential-e will provide the following service education.

| Education | Timeline | Method |
|--|--------------------------|-------------------------------|
| Raising incidents for faults/issues | On Boarding | Face-to-face CMDB document |
| Raising changes for system changes | On Boarding | Face-to-face CMDB document |
| Reporting | On Boarding | Face-to-face CMDB document |
| Requesting the creation of new Supported Items | On Boarding | Face-to-face CMDB document |
| Requesting the addition of Supported Item resources | On Boarding | Face-to-face CMDB document |
| Disaster Recovery and Business Continuity design and process | On Boarding | Face-to-face CMDB document |
| Solution design documentation for Supported Items | First 3 months of BAU | CMDB document |
| Solution configuration documentation for Supported Items | First 3 months of BAU | CMDB document |
| Solution testing documentation for Supported Items | First 3 months of BAU | CMDB document |

Accountabilities and Responsibilities

RACI

A responsibility assignment (RACI) matrix showing whether Exponential-e, the Customer or any relevant third parties are Responsible, Accountable, Consulted or Informed in respect of a particular aspect will be drawn up to ensure a joint understanding. The RACI is bespoke to the Customer, is formalised during the On Boarding phase, and is documented in the CMDB.

The following table details who is responsible for high level ITIL-level RACI activities for the OS & Application Managed Enhanced Operational Management Level. Some activities are shared between Exponential-e and the Customer, where the Customer will be responsible for activities such as raising or approving change requests. Specific details are documented within the CMDB.

| ITIL Process | Exponential-e | Customer |
|------------------|---------------|----------|
| Asset Management | RA | CI |

| ITIL Process | Exponential-e | Customer |
|--------------------------|---------------|----------|
| Change Management | RA | RACI |
| Configuration Management | RA | CI |
| Event Management | RA | CI |
| Incident Management | RA | CI |
| Patch Management | RA | CI |
| Release Management | RA | CI |
| Request Management | RA | RACI |

The Customer is responsible for all RACI activities for areas that Exponential-e is not responsible for. During the On Boarding activity the Customer shall identify key internal and 3rd line primary and back-up contacts to the Service Desk and promptly inform the Service Desk of any changes during the term of the Contract.

Service Requests

Service Requests are requested changes to a Supported Item or a request for an operational task made by the Customer.

Types of Service Requests may include those set out in the table on the following pages.

Where a Quantity and Frequency are specified in the table on the following pages, this is a maximum allowance included free of additional Charges over the corresponding timeframe. Service Requests in excess of this allowance will be accepted by Exponential-e but shall be invoiceable in arrears in accordance with Exponential-e's then-current Professional Services rates. For the avoidance of doubt, allowances apply on a "use it or lose it" basis and unused portions of any allowance cannot be rolled-over or the subject of any credit. Where the Quantity is designated as N/A, there is no maximum allowance and no additional charges shall apply.

All Service Requests that are designated in the table on the following pages as PR and any other Service Requests of a type not listed in the table are not included within the Charges for the Flex Manage Services and will be invoiceable in arrears in accordance with Exponential-e's then-current Professional Services rates plus any additional charges that apply as agreed in writing at the time of Service Request acceptance.

All Service Requests will be reviewed, verified and subject to approval by Exponential-e and Exponential-e will confirm if additional charges apply.

Service Requests will be subject to the applicable Target Time to Complete (if any) set out in the table on the following pages. Exponential-e shall use reasonable endeavours to complete the Service Request within this timeframe. The Customer may request the delivery time for all Service Requests to be scheduled for a future date/time in which event, the Target Time to Complete will commence at the relevant date/time.

Service Requests will be carried out by Exponential-e during the Hours stated in the table on the following pages. Should the Customer request that they be carried out outside of the applicable Hours, additional charges in accordance with Exponential-e's then-current Professional Services rates will apply.

| ID | Request Description | Availability | | Type* | Hours | Time to Complete | Quantity | Frequency |
|----------|---|--------------|-------|-------|-----------------------|--|----------|-------------|
| | | Email | Phone | | | | | |
| SROAM 01 | Shut down OS | Yes | Yes | OSR | 24 x 7 x 365 | 1 hour | 10 | Per month |
| SROAM 02 | Reboot OS | Yes | Yes | OSR | 24 x 7 x 365 | 1 hour | 10 | Per month |
| SROAM 03 | Request new physical SI | Yes | Yes | PR | Normal Business Hours | 7 Working Days following hardware delivery | N/A | As required |
| SROAM 04 | Request new virtual SI | Yes | Yes | PR | Normal Business Hours | 1 Working Day | N/A | As required |
| SROAM 05 | Change IP address | Yes | Yes | OSR | 24 x 7 x 365 | 1 hour | 1 | Per quarter |
| SROAM 06 | Change hostname | Yes | Yes | OSR | 24 x 7 x 365 | 1 hour | 1 | Per quarter |
| SROAM 07 | Complete emergency patching | Yes | Yes | SO | 24 x 7 x 365 | 8 hours | 1 | Per quarter |
| SROAM 08 | Complete emergency AV scanning | Yes | Yes | SO | 24 x 7 x 365 | 8 hours | 1 | Per quarter |
| SROAM 09 | Complete additional backups of the SI | Yes | Yes | SO | 24 x 7 x 365 | 8 hours | 5 | Per quarter |
| SROAM 10 | Restore the full physical server from backup | Yes | Yes | OSR | 24 x 7 x 365 | 1 Working Day | 1 | Per annum |
| SROAM 11 | Restore the full virtual server from backup | Yes | Yes | OSR | 24 x 7 x 365 | 1 Working Day | 1 | Per annum |
| SROAM 12 | Restore individual files from backup | Yes | Yes | SO | 24 x 7 x 365 | 1 hour | 60 | Per annum |
| SROAM 13 | Test restore files from backup to test backup validity | Yes | Yes | PR | Normal Business Hours | 2 Working Days | N/A | As required |
| SROAM 14 | Fail over the virtual SI to another location | Yes | Yes | OSR | 24 x 7 x 365 | 1 hour | 1 | Per month |
| SROAM 15 | Adjust the physical resources allocated to the SI upon Customer request | Yes | Yes | PR | Normal Business Hours | 2 Working Days following hardware delivery | N/A | As required |
| SROAM 16 | Adjust the virtual resources allocated to the SI upon Customer request | Yes | Yes | SO | 24 x 7 x 365 | 1 Working Day | 1 | Per month |
| SROAM 17 | Create and format physical disk volumes | Yes | Yes | PR | Normal Business Hours | 2 Working Days following hardware delivery | N/A | As required |
| SROAM 18 | Create and format virtual disk volumes | Yes | Yes | OSR | 24 x 7 x 365 | 1 Working Day | 1 | Per month |

| ID | Request Description | Availability | | Type* | Hours | Time to Complete | Quantity | Frequency |
|----------|---|--------------|-------|-------|-----------------------|--|----------|---------------|
| | | Email | Phone | | | | | |
| SROAM 19 | Create fault tolerant physical disk systems | Yes | Yes | PR | Normal Business Hours | 2 Working Days following hardware delivery | N/A | As required |
| SROAM 20 | Create fault tolerant virtual disk systems | Yes | Yes | OSR | 24 x 7 x 365 | 1 Working Day | 1 | Per month |
| SROAM 21 | Complete one-time performance trend analysis of SI environments (CPU, RAM, disk space, network utilisation) | Yes | Yes | OSR | 24 x 7 x 365 | 2 Working Days | 1 | Semi annually |
| SROAM 22 | Review DR and BC plan | Yes | Yes | SO | Normal Business Hours | 5 Working Days | 1 | Per annum |
| SROAM 23 | OS and application patch installation | Yes | Yes | SO | 24 x 7 x 365 | 8 hours | 1 | Per month |
| SROAM 24 | Hardware firmware installation | Yes | Yes | SO | 24 x 7 x 365 | 2 hours | 1 | Semi annually |
| SROAM 25 | Reset SI management account password | Yes | Yes | SO | 24 x 7 x 365 | 1 hour | 1 | Per quarter |
| SROAM 26 | Review OS and application audit logs | Yes | Yes | OSR | 24 x 7 x 365 | 2 Working Days | 1 | Per annum |
| SROAM 27 | Restart applications | Yes | Yes | OSR | 24 x 7 x 365 | 1 hour | 10 | Per month |

* PR = Project Requirement, OSR = Operational Support Request
